Font Test

dlsweet

October 18, 2017

Purpose

There was a post by user `dlsweet` on RStudio Community concerning the YAML for a PDF document to specify fonts. The solutio was to include informtion in the `header-includes:` section of the YAML. The original used the font `Museo` which I do not have. To test, I tried `FreeSans`

It is not clear how to download Adobe Fonts

`dlsweet` reaponded to Mara Averick…

> Thanks @mara, I didn't have to quite override them separately but you gave me the idea to try moving my LaTex command into my YAML Header.

```
summary(cars)
```

```
##      speed          dist
##  Min.   : 4.0   Min.   :  2.00
##  1st Qu.:12.0   1st Qu.: 26.00
##  Median :15.0   Median : 36.00
##  Mean   :15.4   Mean   : 42.98
##  3rd Qu.:19.0   3rd Qu.: 56.00
##  Max.   :25.0   Max.   :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
